EDUCATION

Bachelor of Science - Information Technology	May 2005
Slippery Rock University of Pennsylvania	

PROFESSIONAL EXPERIENCE

Freelance Software Developer and Consultant	
Kubit Consulting	May 2013 – Present

- Development of a wide-range of applications including payment portals, raffle generators, invoicing systems, auto-billing, data aggregators, web services, HOA management systems, and content management systems.
- Deployment and maintenance of numerous website content management systems including WordPress, Drupal, Joomla, SharePoint, Umbraco, Orchard, Moodle, & DotNetNuke.
- Contract work for large institutions such as Maricopa Community Colleges, Southwest College of Naturopathic Medicine, City of Mesa, & Phoenix Public Library.

Manager - Network, Systems, & Programming	
Maricopa Community Colleges - South Mountain	February 2011 – June 2015

- Design and integration of college student/employee support systems including websites, webservices, reporting dashboards, admin tools, databases, & process automation.
- Development of custom WordPress themes/plugins and a variety of other college-wide applications utilizing ASP.NET, PHP, MSSQL, & MySQL.
- Manager of College Network/Systems Operations including data centers, networks, servers, programming, web applications, databases, VoIP, security systems, and disaster recovery.
- Management and oversight of permanent and temporary staff including duties of hiring, terminating, performance evaluations, and time approvals.

Application Developer	
Gold Canyon International, LLC	July 2007 – February 2011

- Development and enhancement of N-Tier applications focused on the Direct Sales Industry using C#/VB.NET/ASP.NET/PHP and tools such MS Visual Studio, Cygwin, CodeSmith, Visual Source Safe and WinCVS.
- Development of integration points and middleware between disparate systems that handle a wide range of business functions including customer profile management, order entry, order fulfillment, inventory management, distribution, and financial reporting.
- Responsible for the creation and maintenance of all database objects including tables, stored procedures, indexes, and functions in an environment built on MSSQL.
- Creation of complex business reports using MSSQL Reporting Services and Crystal Reports.

Server Administrator	
CrystalTech Web Hosting	August 2005 – July 2007

- Maintenance of over 450 enterprise class servers which include web, database, dns, mail, backup, and development segments running a variety of operating systems including Windows Server and CentOS.
- Responsible for creating custom processes and scripts to automate: software builds, software rollouts, audits, password changes, system monitoring, backups, and server builds.
- Identify, research, and resolve issues found on all servers in addition to remaining available via company phone during off hours.

Web Developer	
Slippery Rock University of Pennsylvania	August 2002 – May 2005

- Enhancement and development of university websites using PHP and .NET.
- Creation/modification of MSSQL objects along with custom T-SQL scripts to cleanse data and resolve database issues on the MSSQL and MySQL server backend.
- General bug fixes and content management updates.
